PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building full-stack web applications across personal and professional projects. Skilled at diagnosing complex technical issues, researching solutions, and adapting quickly to new tools and frameworks. Experienced across the full development life-cycle, from database design and API development to front-end implementation and testing, with a focus on building accessible, user-friendly software. Comfortable collaborating with cross-functional teams to deliver reliable, well-tested results.

SKILLS

Languages	JavaScript, TypeScript, HTML/CSS, Python, SQL, Swift
Frameworks	React, Next.js, Vue.js, Angular, Node.js, Express, Flask, FastAPI, Bootstrap, Tailwind CSS, Material UI, jQuery
Databases	PostgreSQL, MySQL, MongoDB, Microsoft SQL Server, Azure SQL, Oracle, SQLite
Cloud & DevOps	Microsoft Azure, AWS, Google Cloud, Docker, CI/CD, GitHub Actions, Jenkins
Tools	Git, GitHub, Postman, Jira, Visual Studio Code, REST APIs, GraphQL, SASS/SCSS, WordPress, Drupal, Sitefinity, Figma, Adobe Creative Cloud, Google Analytics, Welcome, Zendesk, SEO, SEM
Accessibility	WCAG 2.0/2.1, AODA, WAI-ARIA, NVDA, VoiceOver, SiteImprove, Selenium, Lighthouse

WORK EXPERIENCE

McMaster University	Hamilton, ON
Front-End Developer Intern	Mar 2022 – Sept 2022
- Migrated 15+ department websites from Sitefinity to WordPress, enhancing deployment reliability and reducing errors by 30% through optimized migration workflows and validation processes - Remediated website code to meet WCAG 2.0 and AODA standards, restructuring HTML and implementing ARIA roles to boost screen reader compatibility - Conducted performance and accessibility audits with SiteImprove, increasing overall usability scores and page load speeds by 25% - Maintained web content across multiple departments, ensuring consistent quality standards and documentation - Delivered weekly project updates during team meetings, communicating development status with outlining upcoming priorities	
Mohawk College	Hamilton, ON
Front-End Developer Intern	Sept 2021 – Dec 2021
- Developed and tested web features using HTML, CSS and JavaScript, ensuring compliance with WCAG 2.0 and AODA standards - Updated and maintained website content across Drupal and WordPress CMS platforms, maintaining brand consistency - Resolved 20+ weekly technical and content support requests through Zendesk and Welcome ticketing systems, achieving a 99% completion rate - Conducted SiteImprove audits to identify accessibility issues and performance gaps, improving overall site health - Collaborated extensively with internal marketing team and external clients to deliver user-focused web content aligned with branding guidelines	

PROJECTS

Orizon	github.com/kndubois/orizon
<i>Node.js, Express, SQLite</i> - Developed a full-stack trip management web application with secure user authentication, itinerary planning, and expense tracking - Designed and implemented RESTful API routes using Express to handle CRUD operations for trips, bookings, and activities - Implemented session management and password encryption using bcrypt for secure authentication	
Argent	github.com/kndubois/argent
<i>Python, Azure SQL, REST API</i> - Built command-line budget management tool integrating third-party financial APIs for real-time market data and transaction tracking - Designed and optimized Azure SQL database schema, reducing query latency and improving data retrieval performance - Applied object-oriented programming principles to create modular components for budgeting, reporting, and automated notifications	

EDUCATION

McMaster University	Hamilton, ON
Bachelor of Technology in Software Engineering	Jun 2025
